PROJECTS

Leave Management System
Leave Management System combines number of process and systems to automate and easily manage employee data, leave request, track and grant leave. It is used to monitor the leaves of college employees. Employees can track their leaves. It reduces the chances of data loss and allows the faculty to manage leaves and replacement for better scheduling of work load.

Dual Access control for cloud based data storage and sharing
In this project, presenting two secure and efficient cloud based dual access control system in different contexts. We allow data user to generate a download request with the help of authority, a cloud server is able to check if the data user is authorised to gain access the data. No other information is revealed to the cloud server except the Knowledge of wheather the user is authorised.

INTERESTS

- Listening Music
- Playing cricket
